

# CITY OF BIG FALLS WELLHEAD PROTECTION PLAN 2015 ANNUAL SUMMARY

**2015 Wellhead Protection Measures.** The following table contains information about the WHP actions that were taken during the year. The first column shows the action strategies identified in the WHP Plan that were scheduled to be completed in 2015. The second column shows the actual actions taken for each planned strategy.

ACTION STRATEGY IDENTIFIED FOR THE YEAR	DESCRIPTION OF ACTION TAKEN
Mange old municipal well by permanently sealing.	Old well #1 was sealed 7/9/2015
Review and update the IWMZ inventory	The old pump house was demolished and removed from well site. The site area was graded with draining being directed away from the well location
Maintain isolation distances for new potential contaminant sources in the IWMZ.	Conducted inspection 8/19/2015. No new contaminant sources were noted.
Implement WHP measures in IWMZ	Completed in prior year
Prepare an annual summary for city council about wellhead protection actions during the year.	Completed and submitted to the city council for review at the December regular meeting.
Prepare an assessment of WHP Plan implementation efforts	Completed in August of 2015, presented to council and MDH officials.

**2016 Wellhead Protection Measures.** The following items are listed in the City of Big Falls Wellhead Protection Plan as action strategies that are scheduled to be completed during the year 2016.

- Create an article for “The Ripple” about wellhead protection
- Update the city’s webpage regarding the wellhead protection activities
- Educate tank owners in DWSMA about spill prevention using information packets
- Maintain isolation distances for new potential contaminant sources in the IWMZ
- Implement WHP Measures in INMZ
- Prepare annual summary for city council about wellhead protection actions during the year
- Summarize WHP Plan implementation efforts in a report to MDH
